“ Victor was my grandpa, my papa Vic. I never really had a service or place to say goodbye, so I'd figure I would write something here. What he was most known for was his kindness, truly the embodiment of a guy who would give you the shirt off his back. My favorite memory of him was playing computer games with him, and he of course would always let me win. Truly, truly could not ask for a better grandma, and I am the person I am today because of him.
